TURNING DATA INTO ACTION

With over 90% of the World's data being created in the last two (2) years, we have seen the level of importance in managing data and turning it into actionable insight become the topic of conversation in every board room and within every C-level suite across both the Commercial and Federal sectors. Real-time analytics are now a necessity to remain competitive in this data-driven world. At Unissant, we take a holistic approach to solving your data challenges. We believe that the basics of data management is and will remain a major component of any analytic solution. The level of importance in the transparency and quality of data is crucial to meeting regulatory demands and pressures. The ability to trust the data that is used for critical business decisions continues to be a focus for all organizations. Unissant combines our deep expertise and knowledge in data management & analytics with innovative solutions to meet the demands of our clients.

OUR APPROACH TO CREATING ACTIONABLE DATA

Combining data management solutions, along with advanced analytic capabilities will deliver data that your organization can trust to make critical business decisions.

DATA MANAGEMENT & ADVANCED ANALYTICS (DMAA) FRAMEWORK

THE UNISSANT ADVANTAGE

Because of our deep level of expertise in data management, advanced data analytics and emerging data technologies, Unissant has the unique ability to bridge the gap between conventional data management and evolving techniques. Unissant focuses first on understanding an organization's business processes, the scope of the problem, and, whenever possible, how to extend the capabilities of clients' existing investment and infrastructure. We then utilize our frameworks and leverage the latest data technologies to identify and deliver solutions.

Our capabilities encompass all facets of managing data & information from deploying solutions that provide the basic capabilities around data management, to the technical data solutions, and ultimately to the advanced analytic solutions.

Unissant provides advanced data analytics that empower our clients to meet their business goals.

DATA MANAGEMENT AND ADVANCED ANALYTICS

Unissant provides advanced data analytics that empower our clients to meet their business goals. We have deep expertise in finance, health IT, national security and energy.

Unissant delivers innovative, cost-effective solutions to government agencies and private companies to help them tackle their biggest challenges and achieve mission success.

Unissant also has strategic relationships with leading providers of data management and business intelligence services.

Founded in 2006, Unissant is a CMMI Level 3 Dev, ISO 9001:2015 and ISO 27000:2013 company, SDB company with offices in Reston, Virginia and San Antonio, Texas. In August 2015, Unissant was named by Inc. magazine as one of the nation's fastestgrowing private companies (the Inc. 5000 List).

Our specific services are described below:

DATA MANAGEMENT SOLUTIONS

- Data Management Solutions & Support that include various data management disciplines, such as, Data Governance, Data Quality, Metadata Management, Data Architecture, Data Maturity Assessments and Chief Data Officer (CDO) Advisory Services.

DATA INFRASTRUCTURE SOLUTIONS

- Data Infrastructure Solutions & Support that include technology design, development and deployment of various data storage patterns, such as, Operational Data Stores, Data Warehouses and Data Marts. In addition, the design, development, deployment and support of large repositories (Big Data/ Hadoop) for high volume, various formats (variety) and high speed/ throughput (velocity) for research & analytics.
- Enterprise Data Integration services such as, Service Oriented Architecture (SOA) based data integration & delivery patterns; Extract, Transform & Load (ETL): data integration, transformation & batch load patterns; Extract, Load & Transform (ELT): data extract, load and transform patterns; Unstructured Data Patterns, such as, Data Ingestion, Modeling and Indexing for use in Big Data/ Hadoop solutions. Data Security is always at the forefront of our concerns regarding data and information, therefore, we integrate all of our technology with data security solutions.

ADVANCED ANALYTIC SOLUTIONS

- Unissant provides various analytic solutions, using a variety of tools to deliver standard/Ad Hoc Reporting, Scorecards/Dashboards, Data Visualizations and advanced analytics, including, predictive analytics, data mining and data science services.

Unissant has experience in delivering data repositories using on premise and/or cloud solutions leveraging cloud platforms such as Amazon Web Services (AWS) and Microsoft Azure. In addition, our clients look to us to provide solutions where all types of data structured, semi-structured and unstructured data can be ingested, stored and analyzed to achieve the greatest business value.

OUR FRAMEWORKS AND TECHNOLOGIES

As a result of our experience over the past 10 years, we have developed our own internal proprietary Data Management & Advanced Analytics (DMAA) Framework that provides a series of accelerators, best practices and templates to deploy any data integration, storage, management & analytics solution.

At Unissant, we believe in allowing the business to drive the solutions that we deliver. Focusing on the business outcome, coupled with the right data solution, delivers the greatest value to our clients.
